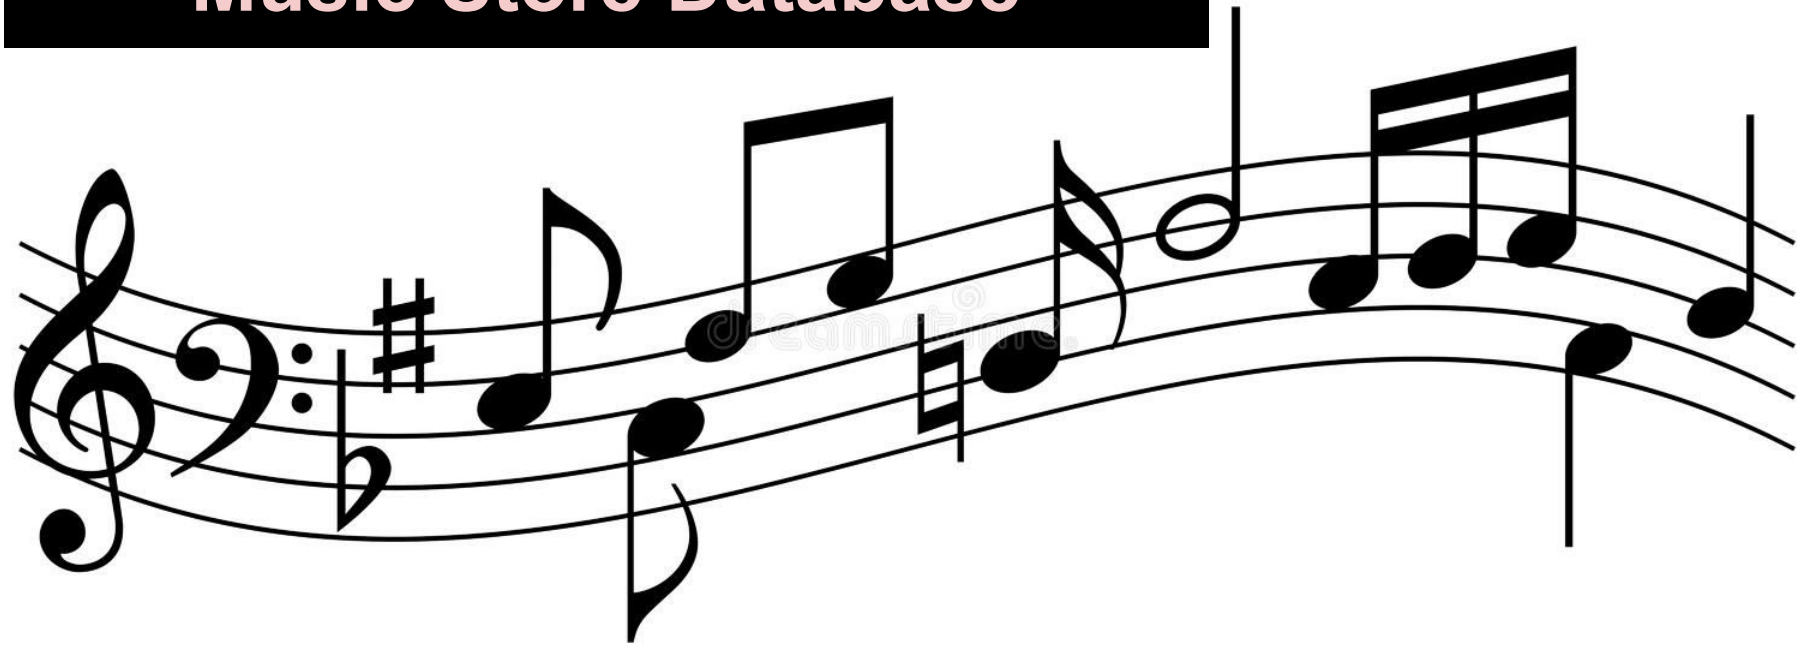
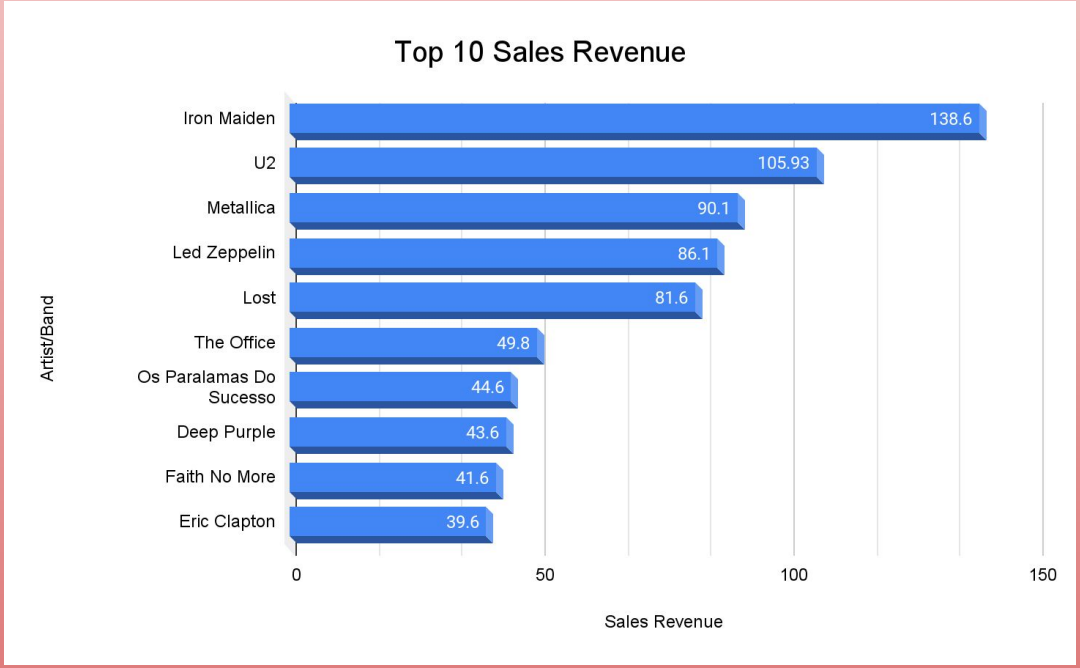
Project #2: Query a Digital Music Store Database

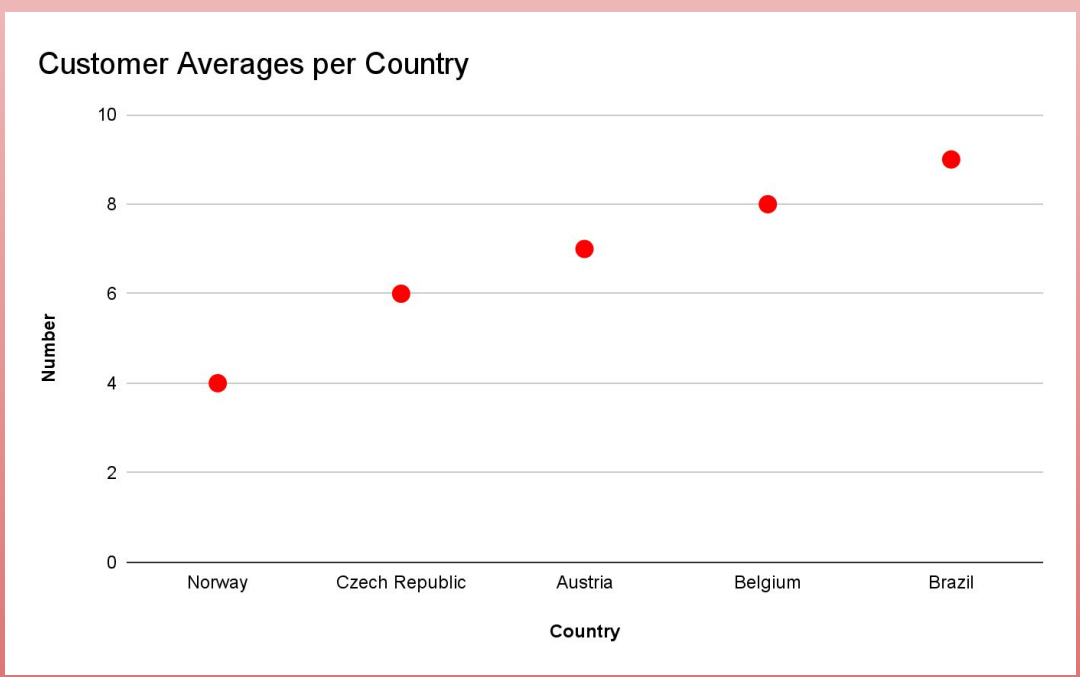


Question #1: Which artist/band saw the highest sales?



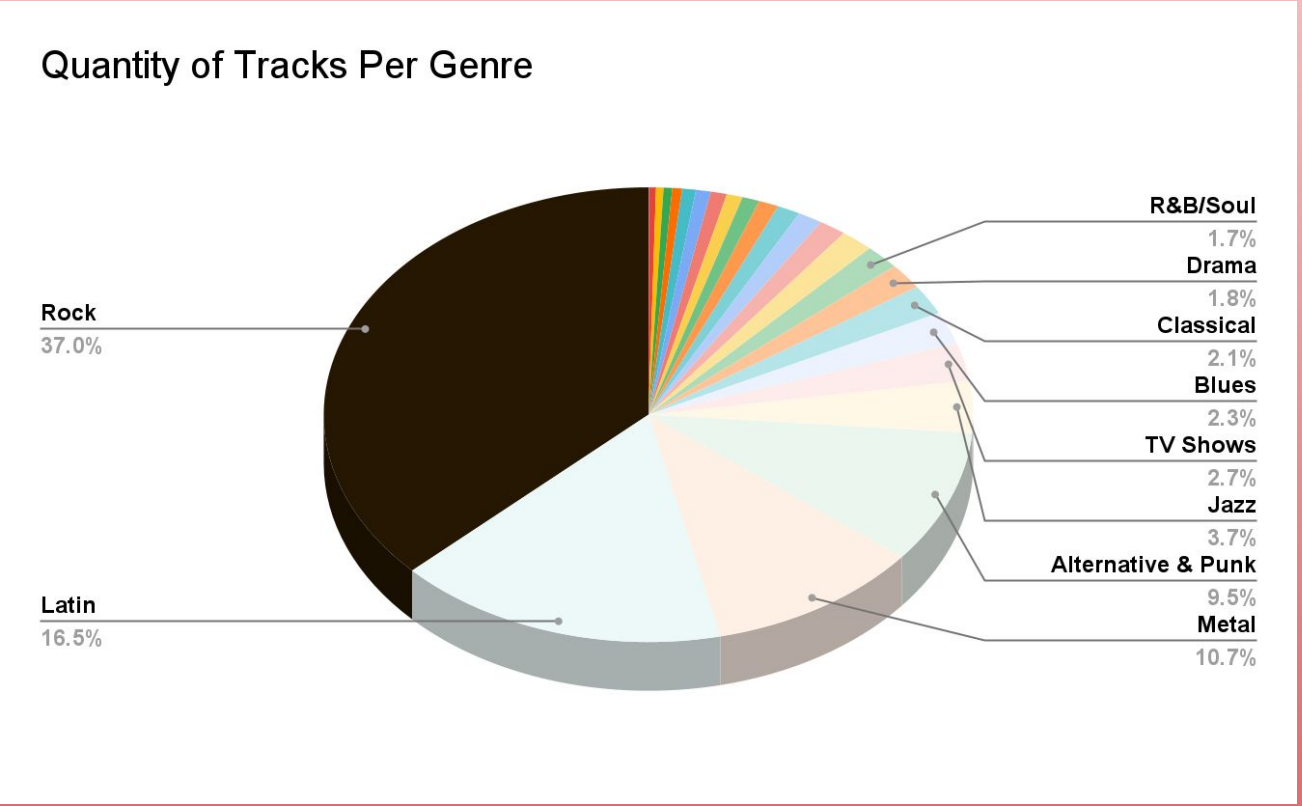
The highest earning artist/band was Iron Maiden, coming in at 138.6. This chart shows all artists who fell in the top 10 highest earners.

Question #2: Which 5 countries have the lowest customer averages?



Out of these 5 countries, Norway has the lowest customer average. Brazil has the highest, but it is still within the bottom 5 out of all countries in the database.

Question #3: Out of the entire database, which is the genre with the most songs/tracks?



Based on the pie chart, 37% of all songs/tracks in the database belong to the Rock genre. Opera is the least populated genre, having only 1 song.

Question #4: Which 3 employees helped the most customers?

From these results, we can see that Jane, Margaret, and Steve are the three employees from the music store who helped the most customers.

The chart breaks down the exact quantity of orders their "SupportRepId" is attached to.
